About Your Vision Care Plan & Your Medical Insurance

There are two types of insurance that will help pay for your eye care services and products. You may have both types and Mitchell Reinhold, OD LLC accepts many vision care and health insurance plans: (1) vision plans (such as EyeMed, VSP and Spectera) and (2) medical insurance (such as Blue Cross/Blue Shield, Medicare and others)

- * Vision plans cover only routine vision exams and may include eyeglasses, sunglasses and contact lens benefits. Vision plans do not provide for medical eye health care needs
- * Medical Insurance must be submitted for any medical diagnoses and treatment care and follow-up.
- * If you have both vision care benefits and medical insurance plans, it may be necessary for us to submit and bill some services to one plan provider and some services to the other plan provider.
- * Where some fees for services and products are not paid by your vision plan or medical insurance providers, you will be responsible for them, including deductibles, co-payments, and non-provider services as specified by the insurance contract.

I have read and accept this office procedure.
